

THE FARNLEY IRON COMPANY, WORTLEY, DOBBS LEEDS

Where Drawings, with Prices, &c., may be obtained

This machine consists of a worm and toothed wheel, acting on a powerful screw, with a piston of rock and; each piece working the machine, which is capable of containing a cut of clay at each end.

The machine is entirely of iron, and the construction is simple, that with ordinary care it will last ten years, and will be WARRANTEED FOR THREE YEARS. It is mounted on wheels, so as to be readily taken to any part required. The design and the files and tooling, and any other parts, are for sale of half a dozen; for pieces of clay shape and size up to twelve diameters, with two receiving tables.

N.B.—The dies for Roberts's Patent Hollow Bricks, as exhibited in Prince Albert's Model Cottage in Hyde park, are constructed for, and supplied with this machine if required. It is capable of being worked by hand, or steam, as well as the Brick Machine, is 1876

The price of the machine, complete, with two tables, two dia. and one screw, for hand-power .....	£1
Intax, driven to be worked by horse-power .....	20
Ditto, ditto, steam-power .....	20

Price of horse power to drive one tile machine, \$1; if to drive two machines, \$2.00; if three, \$3.00 extra. One horse will drive 1275 machines.
